SOURCE

Bomb releasing was practiced over the KAISERSTEINBRUCH (P 48/ K 67) bombing practice ground. Three twin-engine aircraft, whose type could not be determined because of the distance, approached the target in level flight three times at an altitude of about 6,600 feet. They released a total of six bombs each time, as was determined from the number of detonations heard.

25X1A [REDACTED] Comment:

This is the first information on the existence of a bombing practice ground on the KAISERSTEINBRUCH troop training grounds.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
